HILLDAV INDUSTRIES PTY. LTD.

# ETCHING & LINO PRINTING PRESSES

**MORE THAN 30 YEARS MAKING PRESSES IN AUSTRALIA.**

The presses are now manufactured for Hilldav by ABC Light Engineering.

All the presses can be used for **Metal plate, Wood Block**  
and **Lino Printing.**

**Available in:**

- **SMALL MODEL PRESSES.** Available in Direct Drive or Gear Driven Reduction Models.
- **LARGER LIGHT DUTY MODELS.** Available in Direct Drive only.
- **SEMI PROFESSIONAL MODELS.** With Gear Reduction, heavy duty shafts & Bearings.
- **PROFESSIONAL MODELS.** With double Gear Reduction Drive, Heavy Duty Shaft and Bear-

**SMALL MODEL PRESSES.**

All of our presses are of a  
proven design.

# Small Model Press

**Suitable for Students and Schools.**

These small compact presses that are available in either **DIRECT DRIVE** or **GEAR REDUCTION DRIVE**. You can also get them in either **Bench Mounted** or **Supplied With Stand**, and **Lockable Castors** optional extra for the stand, which makes moving them about so much easier, so that they can be put away when not in use.

These presses are driven by a 660 mm (26") Dia. Hand Wheel. This wheel gives easy operation while maintaining "feel" for the plate passing through the roller.

The Bed plate is manufactured from **Black Laminate** which gives high compressive strength, is durable, light weight and does not constitute the same danger of injury that a steel bed plate does. The bed is supported on adjustable supports. A clear Acrylic Lay out Sheet is provided with each press. The bed is supported by adjustable supports.

The Top Roller is made from heavy gauge machined steel, with self aligning ball bearings.

The Top roller is 114 mm (4 1/4") Dia. Machined and ground to high standard of finish.

The Bottom Roller is 89 mm (3 1/2") Dia. Coarse Machined.

**DIRECT DRIVE MODELS.** Driven by the Hand Wheel which connects directly to the bottom roller.

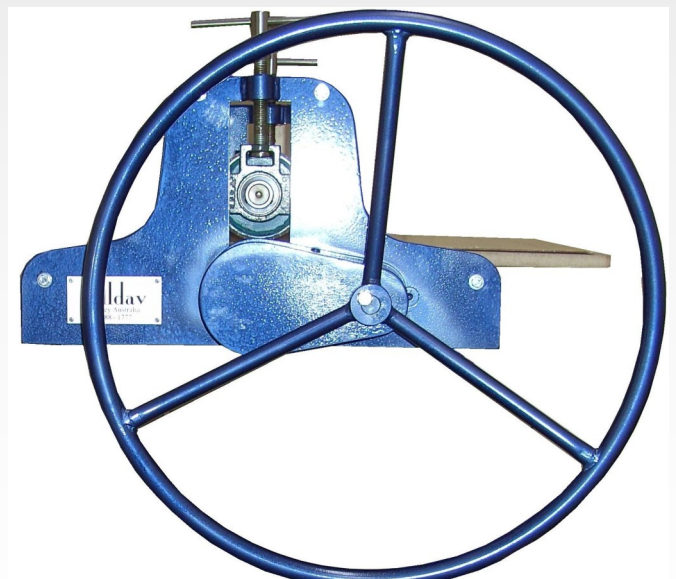

**GEAR REDUCTION DRIVE.** Reduction presses use a roller chain drive, this has the advantage over a gear wheel because the chain wraps around the sprocket. Giving a gear driven Ratio of 2.5:1. This makes it easy to drive the bed through the roller.

*Reduction Drive 18-36 Small Model Etching Press, with Stand and Set of Lockable Castors.*

*Direct Drive 18-36 Small Bench Model Etching Press.*

*Reduction Drive 18-36 Small Bench Model Etching Press.*
