Price on Application.

ELEMENT RODS

19mm (3/4") Ceramic Rod

25mm (1") Ceramic Rod

We can make elements for you !

If you need elements for your kiln, we can make them for you.

We have a record of many of the popular kilns so that we can make elements for them and if we don't have a record ?

We can match an existing element (you would need to send one to us and we could make another to match it) or we can do it from the electrical requirement for the kiln and exact information on the number of elements there length & diameter.

We would keep a record of the kiln and elements so that the next time you needed one we could make it for you.

So if you need elements contact us.
